THE FORECAST CONSULTING GROUP

When it's time to make strategic business decisions, Forecast International's Consulting Services can help you identify and refine the best alternatives.

Since its inception, The Forecast Consulting Group has leveraged its broad expertise to provide its global clientele with practical, efficient strategies to achieve their goals. The following is just a brief sample of our recent projects:

- After a thorough analysis, we recommended which segment of the U.S. business jet market would be best for a client's \$300 million investment.

- By forecasting the market for a diverse group of aerospace and defense segments across a selected group of countries, we developed an opportunity hierarchy and guided our client's focus.

- As a result of a comprehensive, side-by-side assessment of competing products, and a deep dive into U.S. Government and other budgets, we recommended a course of procurement action to a government acquisition program management agency.

Budget (in \$)	Request		Authority		Total Request DC and TOA

- By combining our expertise in forecasting military electronic systems and civil aircraft markets, we identified, analyzed and forecast a substantial new market opportunity.

More broadly, our unique Internet-based, worldwide survey experience has provided numerous clients with the most current and accurate market input upon which to make serious business decisions. Based on such surveys submitted to target market users and opinion makers, and our corresponding forecasts, manufacturers have decided whether or not to acquire existing product lines, or develop new products and bring them to market.

If you have strategic decisions to make, give us a call. While we accept a limited number of projects every year, we review each requirement carefully and guarantee a quick and thoughtful response. In all cases, we take confidentiality seriously. We work tirelessly to help you attain your objectives. And we deliver world-class quality results on time, every time.
